Do You Get A Headache At High Altitude?

If you are interested in learning how your body reacts to high altitude, the Altitude Research Center at the University of Colorado, Denver, needs you for a study of Acute Mountain Sickness (COMIRB #07-0768) All studies will be conducted in our altitude chamber at the University of Colorado Denver, Anschutz Medical Campus.

The study involves the following:

- Time commitment over several months
- Physical exam
- Multiple blood draws
- Bicycle exercise test (VO2 max)
- MRI brain scans
- IV catheter insertion
- Medication for altitude sickness
- Possibility of headache and nausea from the altitude

Subject's requirements:

- Free of medical problems
- No past head injury, seizures, diagnosed migraine headaches or claustrophobia
- Non-pregnant
- Non-smoker
- Men and women ages 18-40

Subjects will receive monetary compensation for participation

Principal investigator for this study is Dr. Robert Roach. If you are interested in participating or would like more information about this study, please contact the **Altitude Research Center** at **303-724-1674** or via email at **altituderesearch@gmail.com**
